To caregivers of children in the school system in Askersund:

Information about allergies

For your child's/children's, and other children's, wellbeing in preschool, school, and after school care it is important that consideration is taken for those suffering from allergies. To make sure that no child falls ill or has an allergic reaction in our preschools, schools and after school care we urge you to think about the following:

- Please do not use strong perfumes or other strongly scented products before entering our preschools, schools or after school care
- Please do not bring clothes worn in contact with animals (such as for example horseback riding) or store these at the preschool, school or after school care
- Please remember that it is important to wash after contact with animals before entering preschool, school or after school care
- Please remember that foods containing nuts, peanuts or almonds cannot be brought to preschool, school or after school care or to activities arranged by these
- Please notify staff, the school nurse or the kitchen staff if your child has any food allergies
- Please remember that the city of Askersund does not allow the use of tobacco products during work hours and that second hand smoke can be strongly affect those with allergies

As a caregiver you are responsible for informing the staff about your child's allergies. Caregivers need to provide medical certificates for a child's special dietary needs. Please notify the school nurse of any changes in allergies or dietary needs.
